

GLUCOSE VS. KETONES

ENERGY SOURCE COMPARISON

KETOBOOST VS. GLUCOSE

GETTING INTO KETOGENESIS

KETOBOOST VS. OTHER KETO PRODUCTS

KETOSIS & KETOGENESIS

Glucose & ketone levels raise with extra calories from MCT/sodium.

With a raw BHB compound you only raise the levels of ketones, but they are still **lower** than the glucose levels.

With more ketones and less glucose, Ketoboostr works as a **fat burning formula** and a **nootropic** to give you a more controlled and sustainable energy source for your body and your mind.
